

Best Service Arabic E-Oud

Arabic E-Oud brings the direct, expressive sound of an electric oud to any DAW. Recorded by oud virtuoso Bassam Ayoub, it combines authentic playing techniques with the focused sound of its built-in pickup. The result is an instrument that feels equally at home in traditional music, world music, film, pop, and modern productions.

With 25 articulations, multiple velocity layers, and up to 16 round robins, Arabic E-Oud delivers expressive ornaments, fast runs, tremolos, and rhythmic accompaniments with a lively and natural feel. Integrated microtunings make it easy to create authentic Middle Eastern scales and Maqam performances, while the modern Engine Player provides a fast and intuitive workflow. Engine Player 1.6.0 or higher is required. Free Update: Existing Arabic E-Oud owners can download the new Engine Player version for free from their Best Service account.

Arabic E-Oud is available now as a download license. To celebrate the Engine Player launch, Arabic E-Oud is 30% off. Owners of Arabic Percussion Collection, Arabic Oud, or Qanun can also take advantage of an attractive crossgrade offer.

Prices:
