Best Service Ancient ERA Persia

Ancient ERA Persia brings the rich sound world of Persia into any DAW. Mysterious instruments, expressive loops and atmospheric soundscapes instantly turn ideas into music full of character. Eduardo Tarilonte’s library transforms every click into an inspiring experience that is versatile, immersive and full of surprises, just like the Orient itself.

28 authentic instruments including percussion, strings and winds feature true legatos, glissandi, dynamic nuances and a wide range of articulations. The library also includes more than 1,000 percussion loops, 51 soundscapes and carefully performed phrases. The microtuning module allows you to use traditional scales from Arabia, Persia and Turkey or create and store your own presets.

The Engine Player makes working with the library intuitive and enjoyable. Volume, articulations, layers and microtuning are instantly accessible. Real time control and flexible layer mixing ensure that ideas are immediately playable so you can stay focused on your music.
