

Best Service Qanun

The Qanun is one of the central instruments of Oriental music - featuring a clear, distinctive tone that instantly creates atmosphere. The Syrian multi-instrumentalist Bassam Ayoub now brings this sound into the virtual world as a library. Building on his work on libraries such as "Arabic Oud" and "Arabic E-Oud," he has recreated the instrument in a highly detailed and playable way.

The library for the Engine Player features a modern, clean interface and a direct workflow. Articulations are split into "performed" and "playable", complemented by integrated Microtunings for authentic scales and tonal colors. In short: an expressive, instantly playable Qanun focused on natural feel and flexibility.

Overview:

- 22 articulations
- Multiple velocity layers
- Up to 16 round robins
- Integrated microtunings
- All essential timbres included
- Requires Engine Player version 1.5.2 or higher

Best Service introduces Bassam Ayoub's Qanun for Engine Player

Thursday, 23 April 2026 15:59

Existing Qanun users can download the update for free via their Best Service customer account on the website below. To celebrate the launch, we are offering 30% off the full version as well as the crossgrade. Qanun is now available at a special price of 69 € instead of 99 €. Registered users of Arabic Oud or Arabic E-Oud can get the crossgrade for only 49 € instead of 69 €. All customers also receive the Khashkash from the Arabic Percussion Collection by Bassam Ayoub for free. Offer valid until May 4th.
