

Eduardo Tarilonte Totem

Totem by Eduardo Tarilonte features 12 Native American Flutes, each with its own distinct character. The recordings preserve the natural breath, subtle playing nuances, and expressive dynamics of real performances. Detailed control is provided by features including Natural and Editable Legato, Blow Intensity, Vibrato, Finger Hole Sounds, and Release Sounds. A second flute can be added as a drone, while the speed of the ornaments can be adjusted to match the performance.

Each flute comes with its own Phrases instrument, featuring Keyswitch variations and phrases at 75, 85, 110, and 155 BPM. Totem also includes 20 atmospheric Soundscapes featuring flutes, textures, and drones for cinematic backgrounds and atmospheric sound design. 11 of the 12 flutes are from Forest Kingdom 3, while the F# Spanish Cedar and the Soundscapes were newly recorded specifically for Totem.

Totem is available now for \$99 as a download license. It requires Engine Player 1.6.0 or higher.
