Not only that, but both kits have dedicated trigger channels for the kicks and snares. Blend hand-picked samples from the Jens Bogren Signature Drum Samples pack and your own custom one-shots, all without leaving the instrument! Effortlessly create lifelike drum performances: our Anti-machinegun algorithm intelligently adds variation to fast consecutive drum hits to avoid unnatural effects. Additionally, Auto Double Kick automatically alternates between two different kick drums/pedals during fast kick drum runs. There's absolutely no mistaking Eloy's unique style. So, why not harness the extraordinary skill and power of the man himself for your own tracks?

With over 150 MIDI grooves written and performed by the one and only Eloy Casagrande, this can be your reality. It is as simple as dragging and dropping any of the MIDI grooves straight into your DAW. "I'm bad at drum programming" is no longer an excuse! Eloy's got you covered.
