BOOM Library BOOM ONE Update 26-02

BOOM Library announces the BOOM ONE Update 26-02, pairing the crisp subtlety of bird vocalisations with the surgical precision of suppressed firearms. With over 500 new sound files, 3,000+ individual sounds, and 13GB+ of professional-grade content, this release adds depth, realism, and versatility to any sound designer’s arsenal. The collection BIRDS offers 70+ recordings focused on isolated bird species, giving sound designers access to clearly defined individual calls, supported by environmental ambience recordings and wing flap variations. Whether you’re building serene natural soundscapes or fine-tuning creature vocalisations, these recordings are clean, characterful, and production-ready.

Species Include:

- Owl
- Blackbird
- Oriole
- Parrot
- Ring-Necked Parakeet
- Flamingos
- And more

Content Highlights

- Individual bird calls and species-specific vocalisations
- Environmental ambiences from aviaries and active forests
- Wing flap variations

The category SILENCED WEAPONS features over 280 recordings of 25 different suppressed firearms, recorded from five distinct distances to capture spatial realism

Phoca PDF

and tonal consistency. With microphone configurations ranging from collar-mounted and stereo arrays to long-distance perspectives at 100 metres, this collection is ideal for films, games, and military training simulations requiring precise weapon sound design.

Weapons Include:

- Modern tactical platforms: Glock 18, UMP, MP5, Steyr AUG, Remington 700
- Soviet-era classics: AK variants, Mosin Nagant, VSS Vintorez, PKM
- Precision rifles and rare weapons: Blaser R8, Steyr HS .50 M1, ERMA EM1

Distance Coverage:

- 0m (collar and shoulder position)
- 5m (XY & MS stereo)
- 15m
- 50m
- 100m

Additional Elements:

- Suppressed weapon handling
- Bullet crack variations
- Projectile whiz-bys

Over 130 additional files round out the release with a diverse set of textures and accents. These cover both natural and designed elements to keep workflows flexible and libraries well-stocked.

Content Highlights:

- Sea ambiences
- Designed impacts
- Designed whooshes
- Wood handling and movement sounds
- And more

Total January Collection Overview:

- 500+ Sound Files
- 3,000+ Individual Sounds
- 13GB+ of Content

From meticulously isolated avian tones to high-detail firearms captured across multiple distances, BOOM ONE Update 26-02 offers high-performance audio assets for productions that demand accuracy, variety, and polish.
