

BOOM ONE Update 26-05

Sci-Fi Doors, Musical UI, and a Toy Car recorded like a Feature Film Vehicle

BOOM Library announces BOOM ONE Update 26-05, pairing the mechanical precision of sci-fi door systems with the musicality of UI sound design. With over 550 new sound files, 3,000+ individual sounds, and 13GB+ of professional-grade content, this release adds texture, depth, and character to any sound designer's toolkit.

Over 200 files dedicated entirely to futuristic doors and access systems. Spaceship airlocks, vault entrances, elevators with genuine weight. The collection goes well beyond basic servo recordings: droning power loops for constant mechanical hum, charge-up sequences for doors that require a moment before opening, lock mechanisms with proper mass and security, and air pressure releases for that classic sci-fi hiss. Two complete elevator systems are included, along with a hydraulic car lift and additional source recordings for designers who want to build their own.

Content:

- Locks
- Mechanical Movements
- Servos
- Air Releases
- Elevators
- Hydraulic Car Lift
- Droning Loops

- Charge Ups and Downs
- UI
- Computational Elements
- and more

100+ UI sounds built from actual instruments: piano, marimba, hand drums, chimes, and synths. The results are smartphone notifications, pop-ups, clicks, and menu interactions that are tonal and musical by design. They layer well for sweetening and work across apps, game menus, and interface contexts where a generic beep would break the experience.

Content:

- Smartphone Notifications
- Vibrations
- Chimes
- Jingles
- Stingers
- Beeps
- Pop Ups
- Clicks
- Sweeteners
- And more

A professional voice actor was hired to record a complete military NPC character, delivering a full vocal set ready to integrate into any project. Electromagnetic pass-bys were captured with specialised gear. Ambiences are included. A remote-controlled ride-on car was recorded from three simultaneous perspectives: engine position, electromagnetic field capture, and a geophone for ground contact and weight. A complete car wash interior sequence rounds out the release.

Content:

- Military NPC Vocals
- Ambiences
- Remote Controlled Ride-On Car (Engine, EM Field, Geophone)
- Car Wash Interior Sequence
- And more

Total April Collection Overview:

- 550+ Sound Files
- 3,000+ Sounds
- 13GB+ of Content

Sci-fi doors, musical UI, military vocals, and a toy car recorded like a feature film vehicle. That's Update 26-05. BOOM ONE subscription includes every update,
