BOOM Library SEASONS OF EARTH - EUROPEAN AUTUMN

BOOM Library, a company with expertise in premium sound effects, announces the release of SEASONS OF EARTH - EUROPEAN AUTUMN. This library delivers dependable, production-ready exterior ambiences that capture the distinct acoustic character of autumn. To mark the launch of this final part of the collection, new low-priced bundles have also been announced.

Key Features at a Glance:

- Authentic European autumn forests and grasslands recorded on location
- Captured in full 3D using a Schoeps ORTF-3D spatial rig
- Delivered in 3D Surround and Stereo
- 100% natural recordings with no foley or synthetic layering
- Includes seasonal leaf rustle, branch motion, and unstable wind beds
- Features authentic seasonal animal activity (cranes, wolf howls, deer mating calls)
- 24-bit / 96kHz WAV files optimised for Atmos and immersive workflows
- Clean, consistent BOOM metadata organised by habitat and behaviour

Autumn environments are difficult to record cleanly. The season has a unique sonic signature that sits right between summer density and winter sparseness. Because of this, consistently capturing elements such as leaf movement, branch stress, and unstable wind beds is a major hurdle for field recordists. EUROPEAN AUTUMN addresses this by offering controlled, repeatable access to real European forests

and grasslands in genuine autumn conditions. There is no synthetic layering, no foley, and no constructed scenes, just authentic environmental behaviour.

Recorded on location using a 3D 8-microphone spatial rig, the library delivers a true environmental perspective with natural depth and localisation. This ensures an immersive spatial image directly from the microphone's perspective. Designed for Atmos and immersive workflows, EUROPEAN AUTUMN is delivered in both surround and dedicated stereo editions. Crucially, the stereo version is a separate capture rather than a simple fold-down.

From calm, breezy forest mid-days to deep wind gusts across open terrain, the collection encompasses the full spectrum of the season. Users will find natural leaf rustle beds, mixed vegetation movement, and thicket motion. The library also captures detailed seasonal bird activity, including forest bird beds, woodpecker knocks, ravens in the wind, small birds like tits, and crane activity in grassland environments.

Tailored for sound designers and editors across film, TV, documentary, and AAA game audio, EUROPEAN AUTUMN is delivered as 24-bit / 96kHz WAV files. The library features clean, consistent BOOM metadata standards, organised by habitat and behaviour to make searching and placing assets in large sessions incredibly fast.

Pricing 3D Surround:

- Regular $385.00
- Special 20% off intro price $308.00 until March 26th 2026

Pricing Stereo:

- Regular $139.00
- Special 20% off intro price $111.20 until March 26th 2026

Specifications:

- 3D Surround: 248 3D Surround files (372 incl. Stereo) | 96kHz/24bit | 88.4GB (110.6 GB incl. Stereo)
- Stereo: 124 WAV files | 96kHz/24bit | 22.2GB

Seasons of Earth Europe Bundle (includes all 4 Seasons of Earth European libraries)

- Stereo: $329.00 - $82.25 per library (40% off) - 470+ Files | 89+GB
- Surround: $699.00 - $174.75 per library (54% off) - 950+ Files | 350+GB

Seasons of Earth All Seasons Bundle (includes all 8 Seasons of Earth libraries)

- Stereo: $549.00 - $68.63 per library (50% off) - 870+ Files | 150+GB

Phoca PDF

- Surround: $999.00 - $124.88 per library (67% off) - 1,700+ Files | 690+GB

BOOM Library's SEASONS OF EARTH - EUROPEAN AUTUMN is available for purchase and download from March 12th, 2026.
