

Celestion Truvox 0820

Celestion, a manufacturer of professional loudspeakers and compression drivers for sound reinforcement applications as well as guitar and bass loudspeakers, is pleased to announce that the Truvox 0820 8-inch ferrite magnet mid/bass driver is now shipping. This new driver excels as a drop-in replacement and upgrade solution for a wide range of 8-inch mid/bass applications.

The Truvox 0820 is equally adept as the principal woofer in two-way cabinets or as the mid-bass/midrange element in larger, three-way systems, restoring clarity and punch to existing setups. The Truvox 0820 is also an ideal choice for door placement in cars as it shares common mounting specifications. Its industry-standard fixing dimensions ensure simple drop-in replacement, and it is supplied with front and rear mounting gaskets for added positioning flexibility.

Key Features and Specifications of the Truvox 0820 include:

- Greater Xmax and maximum stability: Its triple roll surround enables a greater Xmax of 5mm / 0.2in while ensuring stability at extremes of excursion
- Minimal size and weight: As with all Celestion Professional Audio products, the Truvox range features FEA optimised magnet assemblies to maximise performance while minimising size and weight
 - Lightest weight in its product class at just 3kg / 6.6lb
 - Nominal diameter of 200mm / 8in
- Maximum energy transfer: Thanks to a robust pressed steel chassis
- The driver utilises a ferrite magnet, a 50mm / 2in copper voice coil with a polyimide former, and a cellulose cone with a cloth-sealed surround.

Celestion introduces the Truvox 0820 Mid/Bass Loudspeaker Driver

Monday, 07 April 2025 18:21

- Power rating: 250W / 500W (Continuous)
- Rated impedance: 8Ω
- Sensitivity: 96dB
- Frequency range: 70-6000Hz
- The driver's mounting hole dimensions are 5.5x9.4mm with a mounting hole PCD of 193-201mm.

“The lightweight yet robust, Celestion Truvox 0820, represents the ideal upgrade for a multitude of 8-inch driver applications,” commented Nigel Wood, Managing Director at Celestion. “Whether in two-way, three-way, or automotive applications, the Truvox 0820 delivers the clarity, punch, and versatile integration you’ve come to expect from Celestion.”

The Truvox 0820 is now shipping worldwide.
