purchases available are wide ranging. Rest assured, though, that any purchaser's productions can be elevated with the same handcrafted tones, spanning everything from clean shimmer to rip-roaring high gain. Get this, though: the amps on ChopTones' workbench come courtesy of three premium boutique amplifiers - namely, Bogner Ecstasy 101B, Bogner Shiva EL34, and Two Rock Bi-Onyx. Above and beyond that, everything was captured using iconic speakers and legendary cabinets, alongside a curated blend of microphones working with Neve 1073 analogue pre-amp magic.

The tones available in each and every Dario Comuzzi Signature Pack are all sculpted with the same attention to detail that Dario Comuzzi brings to tours and TV productions, as well as music technology collaborations, duly delivering expressive tone-sculpting power to anyone's favourite guitar amp modeller; after all, this is not about emulating, but rather elevating their sound with character, clarity, and creative punch - whether hitting the stage, recording, or rehearsing.
