

Dawesome LOVE 2

Dawesome announces the release of LOVE 2, the next evolution of its acclaimed audio plugin LOVE - a sound-shaping instrument designed to make any audio shimmer, bloom and unfold like an impressionist painting. LOVE 2 is built on a simple idea: when you are in love, everything feels more intense, more alive, more beautiful. This is exactly what LOVE 2 does to sound. At its core, a musically tuned granular engine creates layered, percussive and flowing textures that blur and bloom like brushstrokes. Complementing this are six freely assignable modules, chosen from a curated collection of more than 20 effects, giving musicians intuitive control over timbre, colour, and space.

Each module offers dedicated sub-presets and its own dry/wet balance, so results feel musical from the first turn. The outcome is transformation you can feel:

- Flat sounds ripple with movement
- Simple tones sparkle with nuance
- A lone vocal blossoms into a vibrant choir
- A static synth unfolds into luminous evolving textures

“At the top, you create the texture - the brushstrokes,” says Peter V from Dawesome. “Below, you shape colour and nuance. LOVE 2 lets you treat sound like light on a canvas.”

Dawesome releases LOVE 2

Friday, 27 February 2026 12:40

LOVE 2 features:

- Musically tuned granular texture engine
six open slots - filled from a curated collection of more than 20 effects
- Drag-and-drop signal flow
- 250+ presets
- Per-module sub-presets
- Intelligent randomization with module lock
- can import presets from Love 1
- VST3 / AU / AAX for macOS and Windows

LOVE 2 is available now for USD/EUR 69. Dawesome offers it for an introductory price of USD/EUR 49 for a limited time. An upgrade from LOVE 1 costs USD/EUR 29, with an intro price of USD/EUR 19.
