Denon DCD-3000NE

Denon, a company with expertise in audio technology with over a century of expertise, proudly introduces the Denon DCD-3000NECD Player.It provides pristine SACD/CD and DSD playback via a 384kHz/32-bit DAC and Ultra AL32 Processing. Reveal unprecedented sonic detail in all of your favorite music, from the deepest, defined lows to the most shimmering highs:

- Standard and high-resolution digital audio: Play all of your digital audio, including SACD/CD and DSD (2.8MHz/5.6MHz), DVD-R/RW and DVD+R/RW files up to 192kHz/24-bit and CD-R/RW content.
- Ultra AL32 Processing: Denon's Ultra AL32 Processing uses interpolation algorithms to produce high-resolution output. Supporting input signals up to 384kHz/24-bit, it upsamples for smoother waveforms and improved sound reproduction.
- High-performance 384kHz/32-bit DAC: An advanced DAC in quad configuration produces clean sound with incredible spaciousness, robust detail, and an incredibly wide dynamic range.
- Pure Direct mode: Pure Direct mode disables the display and digital outputs to minimize interference that might color the audio signal. All you'll hear is clean, detailed, accurate sound.
- Patented vibration suppression: Denon's patented S.V.H. (Suppress Vibration Hybrid) drive mechanism ensures each disc loads quickly and spins precisely, for superior data reading accuracy.

The Denon DCD-3000NE will be available for purchase at authorized Denon retailers from December 2024, at a suggested retail price of €2,500/ £2,200
