Dina Pearlman-Ifil at Superbooth 2026

The ARP Foundation announces that Executive Director Dina Pearlman-Ifil, daughter of legendary ARP Instruments founder Alan R. Pearlman, will attend Superbooth 2026, taking place May 7–9 in Berlin. A passionate advocate for preserving and sharing the legacy of ARP Instruments, Dina Pearlman-Ifil will participate in a series of special appearances throughout the event, offering attendees a rare opportunity to connect directly with one of the most important living voices in synthesizer history.

Scheduled Appearances

Bjooks

- Booth: E105
- 1:00 PM – 2:00 PM (Daily)
- Dina will sign copies of PATCH & TWEAK with KORG, from Bjooks, celebrating the innovation and cultural impact of Korg synthesizers.

Das Synthesizer Magazin

Phoca PDF

- Booth: Lobby
- Dina will sign copies of the current issue of Das Synthesizer Magazin, where she is featured on the cover, highlighting her unique perspective on ARP's enduring influence.

Antonus

- Booth: Z171
- 4:00 PM – 5:00 PM
- Dina will meet attendees and discuss the continuing relevance of ARP design philosophy with the team at Antonus, known for its meticulous recreations of classic ARP instruments.

As the daughter of Alan R. Pearlman, whose pioneering work helped shape modern electronic music, Dina Pearlman-Ifil has dedicated herself to preserving ARP's history and ensuring its innovations continue to inspire new generations of musicians, engineers, and enthusiasts. Dina Pearlman-Ifil was recently featured on the Metamyther Podcast, where she shares rare and candid insights into the history of ARP Instruments, its most famous users, and the company's lasting influence on modern electronic music. In the conversation, Dina reflects on her father's approach to engineering, the creative community that formed around ARP instruments, and the ways in which those innovations continue to shape today's synthesizer landscape.
