Divisimate and SWAM Instruments Bundles

ILIO, a distributor of premier virtual instruments and audio processing software, in collaboration with Nextmidi (Divisimate) and Audio Modeling (SWAM instruments), announces three exclusive Divisimate + SWAM bundles. Designed to offer seamless ensemble performance and real-time orchestration, these limited-time bundles provide an unprecedented opportunity for musicians to experience the power of Divisimate with Audio Modeling's SWAM Instruments at a special discount. These exclusive bundles are only available for two weeks through ILIO's authorized dealer network.

A core motivation behind Nextmidi's creation of Divisimate was to give musicians the ability to play physically modeled monophonic instruments as an expressive ensemble. Now, with the latest updates to SWAM Instruments and the expanded capabilities of Divisimate, three new bundles bring these cutting-edge technologies together in an optimized workflow for composers and performers.

Each bundle includes Divisimate and a curated selection of SWAM Instruments, plus free downloadable templates packed with hundreds of orchestration presets, allowing users to instantly access ready-to-play setups for real-time performance.

Three bundles to choose from:

- SWAM Big Band 2.0 Bundle (reg. $999, now $799): A fully routed and balanced big band setup with five saxophones, four trumpets, four trombones, and rhythm section, featuring 240 playable orchestrations.
- SWAM Orchestra 2.0 Bundle (reg. $2149, now $1719): A complete symphonic orchestra with pre-configured instrument placement and routing, including 300 orchestration presets.
- SWAM String Quartet Bundle (reg. $409, now $327): A ready-to-play string quartet powered by Divisimate Micro, featuring automatic voice splitting for four-part harmony.

For customers who own any products in a bundle, upgrade paths are available. Contact sales(at)ilio.com or the ILIO sales hotline at (800) 747-4546 during Sales
