

e-instruments Pure Strings for iOS

e-instruments unveils Pure Strings, a new app that places a full palette of professional-grade string sounds directly into the hands of iOS users. Available now on the Apple App Store, Pure Strings combines premium sound quality with the intuitive, tactile experience of mobile devices – delivering an expressive, versatile, and responsive instrument for on-the-go music creation.

Whether you're composing film scores, producing modern pop, sketching orchestral arrangements or performing live, Pure Strings turns your iPhone or iPad into a fully responsive string instrument. It features nine expertly sampled and crafted articulations and textures that you can seamlessly morph, blend, and mix using its intuitive interface, controlled effortlessly with simple finger movements.

Pure Strings is designed not just as a tool, but as an experience - one that fluidly responds to your creative impulses. At its core is the Morphpad, a touch-sensitive interface that enables real-time sound blending and shaping. Simply slide your finger across the pad to morph between sustain, pizzicato, staccato, harmonics, trills and tremolo articulations, as well as string machine, synth and vintage tape

string sounds. This isn't just convenient; it's highly expressive.

Musicians no longer need to be tied to the studio to work with premium string sounds. With Pure Strings, you can:

- Play expressively anywhere – from backstage sketching to scoring sessions on the go.
- Add dynamic string textures to live performances directly from your device.
- Produce full arrangements within your preferred DAW using AUv3 support in apps like Cubasis, Logic Pro for iPad, GarageBand, and more.
- Multi-format delivery: Stereo, Ambisonics (B-format), and ORTF3D.
- Explore new ideas through real-time modulation, sound morphing, and effects for inspiration and sound design.

Pure Strings Features At A Glance

- Nine versatile base presets including Strings Sustain, Staccato, Pizzicato, Harmonics, Trills, Tremolo, String Machine, Synth Strings, and Vintage Tape Strings.
- Intuitive Morphpad interface for layering, blending and modulation.
- Built-in FX section with EQ, Reverb, Delay, and Arpeggiator.
- Multiple dynamics control options: touch strip, mod wheel, velocity, and automation.
- Con Sordino button – soften the sound to create a mellow and emotional atmosphere, replicating the effect of mutes used by string players.
- Connectivity via USB, Bluetooth, Network, or class compliant MIDI .interface.
- AUv3 compatibility for seamless integration with iOS DAWs.

Pure Strings is available now on the Apple App Store, and for the price of a few coffees, you get a mobile string instrument you'll use time and again. Intro Offer: 25% OFF until 1st July, 2025.
