

EastWest Hollywood Fantasy Orchestrator

The sixth and final chapter of the epic Hollywood Fantasy Orchestra, the Fantasy Orchestrator is an easy to use and inspiring tool to create music in the style of Hollywood's greatest fantasy film, television, and game soundtracks in seconds. Developed in collaboration with Sonuscore, Hollywood Fantasy Orchestrator features hundreds of customizable presets built with the cinematic world instrument ensembles from the Hollywood Fantasy Orchestra series and allows you to create real-time arrangements based on your MIDI input.

At the heart of Fantasy Orchestrator is EastWest's innovative Scoring Engine, which produces everything from basic string arrangements to very complex orchestrations played by the full Hollywood Fantasy Orchestra. In the Mixer section, you can refine the final output of each instrument by adjusting the volume, pan, equalization, reverb preset, and reverb controls such as send amount, pre-delay, length, and filters.

Presets are organized in four categories:

- **Ensembles:** Ensembles allow you to quickly create rich orchestral arrangements with presets that combine instruments into various strings, brass, winds, percussion, choral and full orchestra ensembles.
- **Ostinatos:** Ostinatos enable you to build rhythmic tension in different meters or create moving melodic lines by only changing a few notes.
- **Scores:** Scores bring classic Hollywood fantasy orchestrations to life, bringing an endless source of inspiration to your compositions.
- **User:** User to store your settings by modifying existing presets or building your own ensembles from scratch.

EastWest releases Hollywood Fantasy Orchestrator

Tuesday, 31 October 2023 18:30

Hollywood Fantasy Orchestrator requires all five sections of the Hollywood Fantasy Orchestra series. You can buy Hollywood Fantasy Orchestrator as part of a Hollywood Fantasy Orchestra bundle for \$499, as a standalone purchase for \$99 if you already have the other five sections at an introductory price, or get it with over 60 EastWest collections with a ComposerCloud+ subscription at the website below.
