

Endorphin.es Plus 3 Midnight Blue

Endorphin.es introduces a new version of its popular Plus 3 desktop pedal: the Plus 3 MIDNIGHT BLUE. Functionally, the MIDNIGHT BLUE is identical to previous versions but comes in a new sleek Midnight Blue design, adding an additional color to the Plus 3 line.

Overview & Features:

- Compact desktop control: for pedals, synths, desktop units, modular
- Expression fader: precise, hands-on control for parameters, macros, or mod matrix assignments
- Sustain button: classic sustain control, desktop-style
- Drone-mode button: hold notes indefinitely
- Aluminium construction in sleek midnight blue design
- Modular-ready: included TRS breakout cable turns expression into an attenuator and sustain into a gate for CV control
- Expands MIDI controllers: adds fader-based expression to controllers
