EnovaNxt CAT6A

Switzerland-based Enova Solutions AG is revolutionizing the Pro Audio and MI Industries with its patented "True Mold" technology, seamlessly merging connector components and cables into fully integrated, ready-made solutions. Following the successful launch of various cabling solutions, Enova Solutions is delighted to bring another innovative product to market.

The metal housing, RJ45 connector, and cable merge into a fully integrated unit thanks to the proven "True Mold" technology. This gives the CAT6A cable solution exceptional robustness and optimal protection against water and dirt. A newly developed strain relief optimizes the pull-out forces, while the conical shape increases bending protection and durability. Interchangeable, color-coded rings also simplify clear labeling. The premium CAT6 cable with a second PUR outer jacket offers improved flexibility and robustness. Developed in Switzerland and manufactured in Europe, the EnovaNxt CAT6A cable is the ideal solution for demanding applications on stage, in studios, and in broadcasting. The cable is available in various lengths up to 100 meters.

"With the new CAT6A cable we continue bringing innovative connectivity solutions to the market", says Renato Jost, founder and CEO of Enova Solutions. "We are proud that all our EnovaNxt products are Swiss-engineered and European-made. With this we are delivering on our promise to develop reliable products for our customers."

EnovaNxt CAT6A Features and Benefits:

- True Mold: By using only the essential connector components, True Mold overcomes traditional connector weaknesses for unmatched durability,

performance and improved haptic.
- Water / Dust Protection: True Mold Technology seamlessly merges connector and cables into a single, integrated unit, providing superior water and dust protection.
- Strain Relief: Newly designed strain relief for an optimized pull-out force.
- Bending Protection: Superior bending protection due to the tapered design, putting an end to drooping cables.
- Color-Coded: 10 interchangeable color-coded rings and boots available, easily swapped without altering wiring.
- Premium CAT6 Cable: Flexible CAT6A cable with second PUR outer jacked.
