

Erica Synths introduces PĒRKONS

It's rather sudden – the bolt of lightning strikes quickly, but the roar follows behind, as if giving one time enough to inhale. Finally, it strikes your ears like the skies breaking apart and in all its magnificence it rides the wind. PĒRKONS – a deity of old known by many names and also by ours on the eastern coast of the Baltic Sea – THUNDER, lord of the skies. We at Erica Synths proudly present our newest creation – PĒRKONS (THUNDER) – a drum machine and synthesizer that will change your

approach to electronic rhythm synthesis – an instrument which bears the weight of a storm beneath its sturdy casing.

PĚRKONS features four sonically versatile hybrid voices (digital sound engine + analogue multimode filter with overdrive) and a sequencer with simultaneous control over all four percussion tracks.

Each voice has 3 sound engine modes, a HP/BP/LP filter and 8 controls for nuanced sound design, including an internal analogue BBD FX send. All voice parameter settings can be saved as KITS. To add dynamics to the performance, parameter automation is implemented and a modulation LFO can be assigned to all parameters.

For a real thunderstorm, integration with external gear is considered - each voice has a dedicated velocity-sensitive trigger input, individual output and FX send and return with 6.3mm jack sockets, along with extensive MIDI implementation. All voices are summed and run through a built-in optical compressor and master overdrive.

PĚRKONS HD-01 is a unique live performance and sound design instrument that tears down the borders between drum machine, synthesizer and drone instrument. Time to ride the skies!

Features:

- 4 hybrid voices (digital sound engine and analogue multimode filter with overdrive)
- 8 controls per voice
- Velocity sensitive trigger inputs for drum pads
- Individual voice outputs
- Individual sends and returns
- 64 kit and 64 pattern memory + additional memory on the SD card
- Built-in analogue bucket brigade delay and optical compressor

Erica Synths introduces PĒRKONS

Wednesday, 15 September 2021 10:00

- Modulation LFO with morphing waveforms, phase shift and 8 destinations
- 4 track sequencer, 4 time divisions and 4 time multiplications per track
- Per-step ratchets and probabilities
- 4 shuffle algorithms
- MIDI IN and MIDI OUT
