

Erica Synths Megarack

The beauty of Eurorack is that you are not limited to a specific synthesizer form factor. This can vary anywhere from super-compact, specialized performance systems to huge studio installations. While we have many options available for the former, the latter was missing from our Eurorack case lineup and we have finally created the missing piece – a large Eurorack case that provides exceptional value

for money.

The Erica Synths Megarack case is for those who take Eurorack seriously – a classically-shaped 8x126 HP all-aluminium case with side panels, featuring Erica Synths custom rails with threaded inserts providing 12A@+12V and 6A@-12V.

This monolith will provide ample housing for your modules, all while retaining a sleek elegance not commonly found in cases of this size. In addition, it features 2 4-pole XLR connectors for gooseneck lamps (not included). You can find the lamps on the website below.
