

Erica Synths x Sonic Potions Drum Synthesizer LXR-02

Two companies - Sonic Potions and Erica Synths joined efforts to develop a drum machine that would stand apart from the masses and the LXR-02 was born. The LXR is a fully-fledged digital drum machine with an integrated sequencer. Its sound engine provides 6 different instruments, each with over 30 parameters to tweak, producing sounds from classic analogue emulations to crunchy digital mayhem, thus offering some of the most extensive sound design capabilities found on a drum synthesizer. Its compact, durable design and clear user interface make it ideal for live gigs.

Features:

- 6 drum voices
- Powerful sound design engine
- Over 30 adjustable parameters per voice
- Voice volume sliders
- Insert FX section
- 4 assignable 6,3" jack outputs (2x stereo or 4x mono)
- Full-size MIDI in/out
- Flexible, performance-oriented 64 step sequencer
- Performance mode with mutes, rolls, master bit-crush, and kit morphing
- Kit, Pattern, Performance, and Song memory
- SD card for easy FW updates and Project backup
- USB MIDI
- Headphone output
- Extensive MIDI implementation
