# 15 Years of EVE Audio

EVE Audio celebrates its 15th anniversary, marking a decade and a half of innovation, precision engineering, and uncompromising sound quality in the professional audio industry. Founded on May 16, 2011, in Berlin, EVE Audio has grown into a globally recognized manufacturer of studio monitors, trusted by audio professionals in recording, broadcast, and post-production environments worldwide.

From the very beginning, EVE Audio set out to redefine studio monitoring through advanced DSP technology and meticulous acoustic design. A major milestone came in 2012 at Musikmesse Frankfurt, where the company introduced its groundbreaking SC Series. Early on, EVE Audio made a clear commitment to fully integrated DSP technology across its entire product range - an approach that was still uncommon at the time and has since become widely adopted throughout the industry. Featuring integrated DSP in every monitor, the lineup - including models such as SC204, SC205, SC207, SC208, SC305, SC307, SC407, SC408, and the TS subwoofer series - set new standards in flexibility, control, and sonic accuracy.

Over the years, EVE Audio continuously expanded its portfolio:

- 2014 – Launch of the SC3010 and SC3012 main monitors, designed for high-end studio environments
- 2015 – Introduction of the SC203 desktop monitoring system, bringing professional sound to compact workspaces
- 2020 – Release of the SC3070, delivering enhanced performance for critical listening
- 2021 – Launch of the SC4070, further strengthening EVE Audio’s position in midfield monitoring
- 2023 – Introduction of the SC2070, combining power and precision in a

compact form factor
- 2024 – Facelift of the SC3010 and SC3012, alongside the release of the SC205 and SC207 All Black Editions
- 2025 – Debut of the new EXO Series (EXO 24, EXO 25, EXO 27, EXO 28), representing the next generation of EVE Audio monitoring technology

Headquartered in Berlin, EVE Audio continues to embody German engineering values: precision, reliability, and innovation. Every product is developed with a clear focus on accuracy and transparency, empowering audio professionals to make confident decisions in their work.

As EVE Audio celebrates its 15-year milestone, the company remains committed to pushing the boundaries of loudspeaker technology. With the introduction of the EXO Series, EVE Audio enters a new chapter - one that builds on its heritage while embracing the future of professional audio monitoring. “Over the past 15 years, our mission has remained unchanged: to provide audio professionals with tools they can trust,” says company´s founder, CEO and head of R&D Roland Stenz. “We are proud of what we have achieved and excited about what lies ahead.”
