Eve Audio SC205 & SC207 All Black Edition

EVE Audio introduces a new update to its popular SC series: the SC205 and SC207 models are now available in a stylish and modern black variant. This new color option not only offers a refined aesthetic but also enhances versatility, making these models an even better fit for various environments. SC205 and SC207 – Performance and Design in Perfect Harmony Since their debut, the SC205 and SC207 have become established as high-performance all-rounders in their category. Known for their outstanding quality, user-friendliness, and versatility, these models now boast a sleek new look in black, adding a touch of elegance to their already impressive functionality.

"We understand that design and performance must go hand in hand," says General Manager Roland Stenz. "With the new black option, we're giving our customers not only the trusted performance they expect but also a modern, stylish design that seamlessly fits into any environment." Whether in a professional studio, or in a home environment the new black SC205 and SC207 blend seamlessly into any

setting. Their understated yet elegant design ensures they not only perform but also make a visual statement. The durable matte black finish also provides a low-maintenance surface that will maintain its sleek look even after many years of use.

The SC205 and SC207 models in black are now available. Customers can purchase them from authorized retailers. MSRP for All Black are the same as for SC205 (529 €) and SC207 (649 €) in regular finish. All existing features and the proven technology remain unchanged, so you can continue to rely on the high performance and durability of the products.
