Eventide Misha

Eventide presents Misha, an innovative 28hp Eurorack instrument/sequencer that utilizes a unique, interval-based approach to playing and creating melodies. Misha lets you create sounds via MIDI, control voltage (with three independent gate/cv pairs) or outputting waveforms via the audio jack. Control and play Misha via a MIDI Keyboard or a standard USB QWERTY keyboar.

Misha comes with 100 different scales - from standard pentatonic scale up to various micro-tone Scakes and more. Misha has slots for up to 100 user/custom scales and supports Scala. Misha is a tone row based sequencer which is inspired by the classic compositional technique used in serial music.

Record and playback your own sequence in order to easily manipulate and expand upon your musical ideas. Use the clock divider to create rhythmic variations of your sequences. Misha has four user-assignable Buttons and 18 user presets and supports polyphony via 3 CV outputs or MIDI. It also features an audio output for the internal oscialltor. The CV inputs can be used for external trigger/control sources and thanks to the clock input, you can syn Misha to any external source in your setup. Connect a standard QWERTY keyboard or update the firmware using the Eventide Device Manager Software. You can save and load scales and settings to a micro SD-card using the micro SD-Card Slot.
