

### FiiO SP5

Today FiiO announces the launch of the SP5 active speaker system, a bold new chapter in desktop and nearfield listening precision. Mixing cutting-edge engineering with key audio innovations, the SP5 offers meticulous acoustic design - ready to redefine expectations for powered speakers at the pricepoint - \$749 / £709. Engineered from the ground up with a dual power supply system, each SP5 speaker is powered by its own dedicated 120W supply. This independent configuration ensures consistent power delivery, minimised cross-channel interference, and a level of sonic stability typically reserved for component systems.

At the heart of the SP5 is an independent 4-channel amplifier design, delivering a impressive 60W + 20W per speaker. This allows for discrete amplification of the 5.25-inch Rohacell-cone bass driver and the 1-inch composite silk dome tweeter, delivering refined, full-range performance with musical detail. The Rohacell driver - a material shared with the many high-end speakers - ensures ultra-low distortion and tight, responsive lows. Paired with a rear cavity-enhanced tweeter featuring an internal magnet structure, the SP5 delivers smooth highs without losing any information.

The 3-band bass and treble adjustment system offers dual-frequency bass extension options for precise tailoring to your environment and tastes. Whether on a mixing desk, a desktop workstation, or a dedicated listening space, the SP5 can

## FiiO reveal SP5 Active Speakers: Ready for Your Home Studio or Lounge

Thursday, 10 July 2025 15:59

---

be tuned accordingly.

With AUX, RCA, XLR, and USB Type-C inputs, the SP5 welcomes analog and digital sources alike and all are oursupported by independent volume memory, so each input retains its own customised level settings. A low-noise, high-precision encoder enables stepless, electronic volume adjustment via the front-mounted control knob, ensuring zero loss of resolution across the spectrum. The SP5 offers full support for

high-definition Bluetooth codecs, including LDAC and aptX Adaptive, enabling lossless wireless streaming with minimal latency. Take command remotely with the FiiO Control App (iOS/Android) which offers 10-band PEQ tuning and complete speaker configuration from your phone, tablet or laptop.

With built-in trigger input support, the SP5 powers up in perfect sync with your gear, ideal for integration with home studio setups. A custom IR remote, RGB LED indicators (colours denote input) and a tactile volume knob offer instant control. Finally, the SP5 includes two Furukawa oxygen-free copper power cables, ensuring clean power delivery and maximum electrical conductivity. Available August 2025 priced \$749 / £709.

### Technical Specifications

#### Technical Design:

- Amplification Design: Independent 4-channel power amplification (60W x 2 + 20W x 2 per speaker)
- Total Output Power: 160W RMS (80W per speaker)

#### Drivers:

- Woofer: 5.25-inch Rohacell cone bass driver
- Tweeter: 1-inch composite silk dome with rear cavity and internal magnet

#### Inputs

- Analog: AUX, RCA, XLR
- Digital: Type-C USB
- Wireless: Bluetooth 5.1 with LDAC / aptX Adaptive / SBC / AAC

#### Adjustability

- 3-band bass EQ
- 3-band treble EQ
- Dual-frequency bass extension control
- 10-band PEQ via FiiO Control App

#### Power Supply:

- Dual independent 120W power supplies (one per speaker)

#### Volume Control:

- Low-noise high-precision encoder with stepless electronic volume adjustment

### Control Interfaces:

- Physical volume knob
- RGB indicator ring
- IR Remote control
- FiiO Control App (iOS/Android)
- Trigger Input: Yes (for synchronised power with compatible devices)

### Included Accessories:

- Two Furukawa oxygen-free copper power cables
- Custom IR remote and batteries
- Input cables RCA
- Data cable
