Flock Audio PATCH APP DX 1.1.3

Flock Audio announces PATCH APP DX 1.1.3 – the latest version of Flock's powerful control app for its series of best-in-class all-analog, digitally controlled patchbays. The update adds a quartet of new features – including Bypass Processing, Quick A/B, Auto-Save, and Auto-Hardware Backup – that further streamline the software's operation and make it easier than ever to integrate into users' preferred workflows.

"At Flock, we are committed to constantly honing PATCH APP DX to ensure the most streamlined experience for our users," said Flock Audio Founder and CEO Darren Nakonechny. "These four new features push the boundaries of PATCH APP DX's functionality more than ever before with massive workflow enhancements that appreciably enhance its speed and efficiency."

New PATCH APP DX Features (v1.1.3):

- Bypass Processing – Bypass all processing with a single right-click.
- Quick A/B – Users now have a dedicated icon and drag-and-drop menu for A/Bing different elements of the signal chain. Options can either be scrolled through with a single click on the icon, or chosen from a customizable menu bar.

Phoca PDF

- Auto-Save – Users can customize their launch options for PATCH APP DX, including the classic Blank Grid, Recalling Previous Existing Routings as a default, or Auto
- Saving from the most recent project.
- Auto-Hardware Backup – PATCH APP DX will automatically save a backup of your hardware index each time you open the App, and they can be easily accessed and recalled.
