Focusrite FAST Limiter and FAST Bundle

The latest instalment of the exclusive Plug-in Collective community giveaway is MASSIVE from Native Instruments and Ozone Elements from iZotope. Normally sold for $149.00 and $129.99, respectively, these plugins are free to download for Plug-in Collective members from 6th October to 12th January (4 pm GMT). In addition, access the three-month free trial of KOMPLETE NOW, usually sold for $9.99 per month.

MASSIVE is the ultimate synth for bass and leads. The high-end engine delivers pure quality with a diverse range of sounds, from soft to outright dirty and everything in between. Containing over 1300 production-ready sounds, each with pre-defined macro controls, you can easily fine-tune the sound to your liking without going into all the parameters.

MASSIVE's sound synthesis is based on a unique Wave Scanning algorithm implemented in three parallel oscillator modules. It combines the highest sonic quality with utmost flexibility and controllability. The synth comes with 85 specially designed wavetables, each with a unique combination of waveforms and particular sonic characteristics.

With Ozone Elements, you can effortlessly get your mixes radio and streaming

ready. Building on a two-decade history of best-in-class processing, Ozone Elements has the essential tools and assistive technology you need to quickly achieve a full, rich, and loud final master.

KOMPLETE NOW offers the opportunity to get your hands on some of the most sought-after production tools - a curated bundle of essential instruments and effects that help you achieve high-quality sounds, regardless of genre.

Plug-in Collective is a community hub that brings together members, Focusrite, and the most innovative software brands. To find great virtual instruments and effects, keeping up to date with the constant stream of new releases is essential. Plug-in Collective makes it easy, with regular free software downloads and generous discounts on high-end plugins. To join Plug-in Collective, members simply register any Focusrite hardware product and then look out for a new offer every couple of months. No one else works with software manufacturers like we do to bring you inspirational tools for our members’ next production.
