

Focusrite ISA C8X is Now Available

ISA C8X, Focusrite's first ISA audio interface, is now available to purchase worldwide via [focusrite.com](https://www.focusrite.com) and authorised resellers. ISA C8X brings the warm, rich sound of ISA into a modern 26-in, 28-out USB-C interface. Two ISA Lundahl LL1538 transformer preamps sit alongside six ultra-low-noise, modern Focusrite preamps, with a design originating from the Red and RedNet range. ISA C8X also features all-analogue Console and 430 Air tone-shaping and full control from the front panel, or remotely from the Focusrite Control 2 mobile app.
