Harrison Audio announces Free 3D Delay Plug-in

Harrison Audio, the legendary force behind decades of chart- topping records and groundbreaking studio innovations, is putting pro-grade Delay FX within everyone's reach. Artists, producers, and engineers can download the 3D Delay plug-in - derived from Harrison's digital console technology - absolutely free from the Harrison eStore. As well as the 3D Delay, Harrison Audio have also released 3 new premium plug-ins - Stunning Phaser, Dyno Mite, and Spectral Gate, which are now also available to purchase on the Harrison eStore.

3D Delay is a professional-grade stereo delay processor designed for instant, mix-ready results. Whether you want to add depth and width with doubling and slapback echoes, craft evolving multi-tap ping-pong effects, or infuse your tracks with vintage rackmount delay character, 3D Delay delivers. Featuring three individually adjustable delay taps with full panning, feedback, filtering, modulation, and tempo sync, it's perfect for bringing vocals forward, widening guitars, or adding motion to synth leads. With 10 mix-ready presets and a comprehensive control set, 3D Delay offers endless creative potential - and right now, it's absolutely free (worth $49).

As part of its "Nashville Hot" Summer, Harrison Audio have also released three more music creation and mixing tools:

- Stunning Phaser – Inject movement, shimmer, and swirl into your mixes with versatile LFO shapes, beat-sync options, and rich, modulated tones. Perfect for everything from subtle drift to extreme sound design.

- Dyno Mite – Inspired by a studio classic, DynoMite gives you precise control over attack and sustain to make drums punch, guitars pop, and mixes breathe.
- Spectral Gate – An intelligent, frequency-dependent noise gate that learns the tonal fingerprint of your source, making it ideal for cleaning up bleed, tightening loops, and sculpting samples without compromising tone.

All three plug-ins are available for just $49 each. You can purchase all 3 and benefit from the 3 for 2 offer that is available on the Harrison eStore. Throw in the free 3D Delay plug-in too and you can get all 4 new Harrison plug-ins for just $98 (Saving $98!). Compatible with AAX, VST, VST3, and AU formats, these tools integrate seamlessly into any modern DAW workflow. Grab your free 3D Delay and explore the full Harrison eStore at the Website below.
