

Icon Touch 8

Touch the future of sound with the brand new ICON Pro Audio Touch 8! The Touch 8 features four Neutrik Combo XLR Mic/Line/Inst inputs, offering flexible connectivity with XLR and 1/4-inch (6.35mm) jacks. Combined with four 1/4-inch outputs and ADAT I/O, this interface provides all the I/O options you need to manage your studio or live setup

The Touch 8 is equipped with a 10-inch capacitive multi-touch LCD screen, designed for optimal viewing from any angle. The ultra-responsive virtual faders glide smoothly with a simple touch, while the buttons activate effortlessly with light pressure. The interface includes vibrant, easy-to-read 15-segment metering, along with essential controls like -20dB pad, instrument/mic/line inputs, +48V phantom power, and polarity adjustment for each channel. The intuitive layout also features precise dB level readouts and direct monitoring controls, all presented in a sleek and ergonomic design.

Equipped with high-end preamps delivering an impressive 75dB of gain, the Touch 8 doesn't compromise on audio quality. This interface features top-tier digital-to-analog and analog-to-digital converters that match or exceed the performance of premium competitors. With 128dB analog-to-digital conversion, the Touch 8 offers a stellar 130dB DA conversion, ensuring expansive, crystal-clear sound in every session.

The Touch 8 is equipped with four Neutrik Combo XLR Mic/Line/Instrument inputs combining XLR and 1/4-inch (6.35mm) jack inputs in a single connector. Along with

four 1/4-inch outputs, this interface offers versatile connection options to handle any recording or performance setup. The Touch 8 also includes optical I/O with ADAT expansion: adding 8 additional channels with 1x in and 1x out offering flexible I/O for your studio.

The iO Pro software works flawlessly with the Touch 8, providing seamless control over every aspect of your setup. With just a click, users can access the monitoring panel to manage headphone levels, master outputs, direct monitoring, and OTG inputs. These controls are also easily accessible directly on the device's touchscreen for added convenience. Users can simultaneously connect to the iO Pro software to apply host based plugins like reverb, compressors, and delays during live streaming or performances.

The UNI OTG connector port on the Touch 8 allows direct connection to internet streaming services on your mobile device, making it perfect for producers, engineers, or artists who broadcast to social media. With specially developed coding and dual ARM M7 500MHz chips, this interface provides a stable streaming environment while delivering impeccable audio quality, ensuring your broadcast sounds flawless every time.

Unlock your full creative potential with the cutting-edge software suite bundled with the Touch 8. This impressive collection includes:

- iZotope VEA (Voice Enhancement Assistant): AI-driven audio enhancer for flawless voice recordings.
- Harrison AVA Live: Real-time, ultra-low latency channel strip for precise audio processing.
- Harrison VIP (Vocal Intensity Processor): Boost vocal presence and clarity for standout performances.
- Bitwig 8-Track Studio DAW: A versatile digital audio workstation for all your production needs.
- Tracktion DAW Essentials: Must-have tools and plugins for flexible audio editing and mixing.
- Kilohearts Toolbox: A suite of creative sound design plugins.
- Dotec Audio Plugins: High-quality effects and processors to enhance your sound.

This powerful software bundle ensures you have everything you need to create, edit, and produce professional-quality audio.

What's in the box:

- Touch 8
- 12V Power Supply
- USB Cable
- Quickstart Guide
