

IK Multimedia TONEX Signature Bass Collection

IK Multimedia launches TONEX Bass Editions, which include a new TONEX Signature Bass Collection and two hardware additions to the TONEX Ecosystem specially for bass players: TONEX Pedal Bass Edition and TONEX ONE Bass Edition, both preloaded with gig-ready Tone Models and presets from the collection.

TONEX Bass Overview:

- A dream collection: Legendary bass amps and pedals captured at their sweet spots.
- Superior sound: Created with the new TONEX Modeler for clarity, punch, and feel.
- Phase-tight blend: Perfect dry/wet phase correlation keeps fundamentals strong while adding grind-perfect for blending DI + amp tones.
- Iconic sounds onboard: From vintage tube thump to modern drive, Tone Models deliver the precise response of the originals.
- With added tools: Exclusive VIR: multi-IR cabinets and custom IR Loader, tuner, and 15 pre/post FX
- Signature look: Premium aluminum-silver enclosure with all-over neural design.
- Included software: TONEX Modeler, TONEX Editor, and TONEX CS
- ToneNET expansion: Browse, search, and demo thousands of Tone Models,

including Signature and Tone Partner Collections

Discover a curated collection of 150 Tone Models that cover every style, from clean DI-friendly amps and classic tube stacks to modern solid-state punch and popular bass drives. Highlights include captures based on Ampeg SVT-CL/VR/2-Pro, Fender Bassman models ('53, '59, 100, 300), Markbass, Orange AD200, Gallien-Krueger RB/2001/Fusion, Trace Elliot, Darkglass heads and pedals, Tech 21 SH1/PSA/DP-3X/YYZ, ProCo RAT variants, and more.

Powered by the new TONEX Modeler, each capture benefits from improved Dry/Wet phase correlation, resulting in a more natural, phase-coherent blend of DI and processed signals. This provides clear low-end fundamentals along with drive or saturation, helping the bass sit perfectly in any mix with clarity, punch, and authentic character. Featuring on-stage controls for easy tone switching, the TONEX Pedal Bass Edition comes preloaded with 150 bass-optimized Tone Models and presets, ranging from vintage tube sounds to modern, high-fidelity punch.

Presets are organized into 50 banks, each centered around a legendary bass amp and offering three tone model options per bank. 15 onboard effects are available to enhance or customize any tone model, giving players an unlimited variety of tones for songs of any genre. TONEX ONE Bass Edition is perfect for home setup and easy transport in a gig bag. It offers 20 ready-to-use bass presets in a compact pedal, featuring legendary amp models that range from vintage smooth tones to modern punch and grit.

Each preset is designed to deliver a complete rig with optimized tones and onboard effects. While the pedal can store 20 presets at once, it also provides full access to the entire 150-model Bass Collection. Users can conveniently load their favorites using the included TONEX Editor or create custom Tone Models with TONEX Modeler for Mac/PC. For seamless editing, TONEX pedals include TONEX Editor for Mac/PC that enables real-time adjustments using a connected pedal. It provides access to the user's entire TONEX library, including Tone Models, presets, and ToneNET, enabling quick loading of favorites for auditioning and saving to a designated hardware slot on your pedal.

TONEX software and the new Modeler can be used not only to model any rig but also as a standalone app or a plug-in integrated with any DAW to deliver the exact tone for live and studio use. Both TONEX pedals for bass feature a rugged aluminum chassis for reliable performance. With 24-bit, 192 kHz processing, an extremely wide 5 Hz - 24 kHz response, and a whisper-quiet 123 dB noise floor, they ensure any bass sounds as good as it ever has- even before it hits TONEX's incredible modeling. The TONEX Bass Signature Collection and TONEX Bass Edition pedals offer players a modern and incredibly versatile way to add classic bass tones to their live rig and take center stage.

TONEX Signature Bass Collection, TONEX Pedal Bass Edition, and TONEX ONE Bass Edition are now available from IK authorized dealers worldwide and through the IK
