IK Multimedia iLoud Micro Monitor Pro

IK Multimedia announces the release of the iLoud Micro Monitor Pro, a feature-rich, professional version of the extremely popular iLoud Micro Monitor. The iLoud Micro Monitor Pro delivers studio-quality sound in an ultra-compact format, making critical mixing possible anywhere.

Offering professional sound quality that fits in any backpack, the all-new iLoud Micro Monitor Pro is incredibly balanced with a wide soundstage even at close distances. Double the power of the standard iLoud Micro Monitor, the Pro version provides 50 watts RMS per speaker and offers IK's legendary iLoud physics-defying bass down to 42 Hz. With built-in calibration and X-MONITOR integration, it's more powerful and versatile than speakers twice its price.

Key Features:

- Ultra-Compact Design: Perfect for travel and tight spaces, weighing around 3lb./1.4kg each.
- Powerful Performance: Each speaker sports a 50W RMS Class-D amplifier, custom-designed drivers, and a peak SPL of over 107 dB.
- Advanced DSP: Ensures near-perfect phase alignment, time coherence and flat frequency response for unparalleled accuracy.
- Built-in ARC Self-Calibration: Adjusts instantly to any space with precision, providing consistent sound quality regardless of the environment.
- X-MONITOR Software Integration: Offers complete control over speaker parameters and the ability to emulate the sound of other top studio monitors.

With a frequency response of 50 Hz to 20 kHz (±2 dB), the iLoud Micro Monitor Pro

delivers transparent, true-to-life sound without hype or coloration. The built-in ARC room correction technology instantly tunes the monitors to any room, ensuring the most accurate audio representation, even in the smallest spaces. The iLoud Micro Monitor Pro is more than just a set of portable monitors. With full X-MONITOR software integration, it becomes a complete reference monitoring system. Users can easily switch between different virtual monitoring voices, allowing A/B testing of mixes on a variety of simulated reference systems.

Thanks to a tiltable flip foot design and a 3/8" threaded insert, the iLoud Micro Monitor Pro can be set up anywhere, whether on a desktop, mounted on a mic stand, or wall-mounted. Its versatility makes it the ideal solution for any situation requiring high-quality monitoring. Best of all, they can be spread as wide as needed with no link cable. They can be used independently or bundled together for a powerful immersive setup that takes up minimal space.

The Micro Monitor Pro is the only portable monitoring system that combines the power and essential tools for professionals and audiophiles to perform anywhere the road takes them. iLoud Micro Monitor Pro monitors can be purchased now from the IK Multimedia online store, and IK authorized dealers worldwide.
