

## TONEX Double Special Limited Edition

IK Multimedia introduces the TONEX ONE Double Special Limited Edition and the Double Special TONEX Signature Collection, offering guitarists the expressive cleans, blooming sustain, and vocal overdrive of two legendary combo amplifiers preserved in IK's private amp vault. Valued at over \$300,000 and representing sought-after eras of this iconic circuit design, these amplifiers have been modeled using TONEX V2 AI Machine Modeling technology, giving players access to tones that would otherwise cost six figures.

For players who want the ultimate stage-ready experience, IK introduces the TONEX ONE Double Special Limited Edition. Limited to just 1,000 units worldwide, this collector's edition pedal is crafted in Italy with a custom vintage-brown finish and preloaded with 20 exclusive Premium Tone Models not available in the standard Double Special Collection. Along with the 20 onboard tones, the pedal unlocks the full Double Special TONEX Signature Collection within TONEX software, as well as the ODS Legends Signature Collection featuring 20 additional Tone Models captured from four other Dumble guitar amplifiers. Overall, the package includes six highly collectible amplifiers valued at more than most homes are worth.

The Double Special TONEX Signature Collection includes 40 Premium Tone Models captured from two historic Overdrive Special combo amplifiers. Inspired by expressive blues-driven Texas tones, smooth fusion sustain, and articulate edge-of-breakup textures heard in the work of players such as Robben Ford, Carlos Santana, John Mayer, and Larry Carlton, the collection spans piano-like cleans to harmonically rich, singing lead sounds. Each amplifier was captured with and without the cabinet across a wide range of sweet spots, channel configurations, and gain settings. The collection also includes full rigs with classic front-end boosts based on a gold Klon Centaur, a TS10, and a JHS Morning Glory, recreating the stacked tones often paired

with these amplifiers for added sustain and midrange focus.

The two amplifiers mark key moments in the development of this highly regarded circuit. A late-1970s export model delivers an open top end, blooming mids, and a highly touch-sensitive response, producing piano-like cleans and smooth vocal overdrive. A refined 1980 model offers tighter low end, faster transient response, and increased articulation at higher-gain settings while maintaining its cascading clean-to-overdrive design and signature harmonic complexity.

Both amps were captured through custom open-back cabinets loaded with period-correct speakers, using multiple microphone pairings to capture everything from focused punch to spacious studio depth. The result is a versatile, performance-ready collection that transitions smoothly from expressive rhythm to sustaining leads. Overdrive Special amplifiers have defined some of the most expressive guitar tones of the past forty years. With the Double Special TONEX Signature Collection and TONEX ONE Double Special Limited Edition, IK Multimedia brings these coveted sounds to players worldwide.

Powered by TONEX V2 AI Machine Modeling technology, the Double Special offerings deliver exceptional realism, harmonic detail, and dynamic response. Players can manage and edit Tone Models using TONEX Editor for Mac/PC, with integration across the TONEX ecosystem, including TONEX Pedal, TONEX ONE, and TONEX Plug. The TONEX ONE Double Special Limited Edition features IK's rugged aluminum chassis and high-quality construction for dependable stage performance, combining boutique heritage tone with modern AI-powered modeling.

The Double Special TONEX Signature Collection and TONEX ONE Double Special Limited Edition are available from IK authorized dealers worldwide and through the IK Multimedia online store:

- Double Special TONEX Signature Collection - Includes 40 new Tone Models captured from two Overdrive Special combos from IK's private amp vault, not available in any other TONEX collection.
- TONEX ONE Double Special Limited Edition - Preloaded with 20 exclusive Tone Models not available separately. Also includes the Double Special and ODS Legends TONEX Signature Collections.
