IK Multimedia TONEX ONE+

IK Multimedia announces TONEX ONE+, expanding on the success of TONEX ONE by adding wireless mobile control via the TONEX Control app, eliminating the need for a computer, and making it easier than ever to shape and manage tones anywhere.

Combined with full MIDI integration in an ultra-compact format, TONEX ONE+ delivers the sound, feel and dynamic response of real amplifiers and pedals powered by IK's AI Machine Modeling technology. TONEX ONE+ also includes the exclusive Signature+ Collection, featuring 100 Premium Tone Models, 20 of which are preloaded and ready to play.

Designed for players who demand more from their rigs without added complexity, TONEX ONE+ integrates seamlessly into modern setups and the TONEX ecosystem. With wireless editing from a mobile device and real-time control via MIDI, players can build, adjust and perform with their entire rig without interruption.

TONEX ONE+ pairs its capture technology with wireless and MIDI connectivity for stage and studio use. Edit tones from mobile devices, access ToneNET instantly, and integrate into MIDI-controlled pedalboards for pro-level control on stage or in the studio.

- Hyper-realistic AI Machine Modeled amps, cabs and stomps
- TONEX Control app for ToneNET, wireless editing, and loading
- Full MIDI control via TRS and USB for seamless rig integration
- Store up to 20 presets, all accessible via MIDI

Phoca PDF

- Includes 100 Premium Tone Models plus TONEX SE software
- Access over 60,000 Tone Models from the ToneNET community
- Studio-grade EQ, compression, modulation, delay and reverb
- Improved noise gate for tighter tones across the TONEX ecosystem
- USB connection for recording and preset management

TONEX ONE+ removes the need for a computer by enabling full wireless control through the TONEX Control app (iOS/Android). Players can edit, browse and load tones directly from their phone or tablet, eliminating the traditional desktop workflow and keeping their focus on playing.

ToneNET integration provides instant access to a growing library of Tone Models created by players worldwide, ensuring an endless supply of inspiration wherever music happens.

With full MIDI support via TRS and USB, TONEX ONE+ integrates effortlessly into modern pedalboards and switching systems. Players can access all onboard presets, automate changes and control parameters in real time.

MIDI also enables advanced setups, including dual-pedal configurations for stereo or dual-amp rigs, expanding tonal possibilities while maintaining a compact footprint.

TONEX ONE+ includes TONEX SE along with the Signature+ Collection, a premium library of 100 Tone Models created exclusively for TONEX ONE+. Powered by TONEX V2 AI Machine Modeling™ technology, it delivers a wide range of inspiring tones, from pristine cleans to high-gain leads.

Models are based on a curated selection of iconic amplifiers and pedals, offering a versatile foundation of mix-ready sounds that respond like real gear.

Maintaining the same compact footprint as TONEX ONE, TONEX ONE+ fits easily into any setup, from travel rigs to full pedalboards. Its expanded connectivity and control options make it equally suited for live performance, studio recording and practice environments.

Use it as a standalone solution or combine multiple units to build powerful stereo or multi-amp rigs while keeping your setup streamlined and portable.

TONEX ONE+ is part of IK's growing TONEX ecosystem, giving players access to an ever-expanding library of Tone Models and preset sharing through ToneNET. Capture, share and explore tones across hardware and software platforms, ensuring your favorite sounds are always within reach.

TONEX ONE+ is available now from the IK online store and IK dealers worldwide, and includes the exclusive Signature+ Collection, TONEX SE, and AmpliTube 5 SE.
