

IK Multimedia TONEX Free Unlimited

IK Multimedia introduces TONEX Free Unlimited, a major expansion of TONEX 2 CS, the free edition of its guitar and bass tone software. It brings professional Tone Models, built-in effects, integrated tone discovery and unlimited capturing together in one complete, ready-to-play studio, completely free. Available now with TONEX version 2.2, the release unlocks unlimited free ToneNET downloads and unlimited Tone Model creation in the free edition, alongside 40 included Premium Tone Models, 80 free Tone Models created by Tone Partners and the 15 built-in effects already available in TONEX 2 Player.

A world of professional tone is now open to every musician, with the freedom to discover inspiring sounds from around the world, capture the character of their own gear, and build a personal tone library with no limits on free downloads or captures.

Powered by IK's breakthrough V2 AI Machine Modeling™ technology, the included Modeler captures the sound, feel and response of real amps, cabinets and pedals with extraordinary accuracy, creating hyper-realistic Tone Models ready to play and share with the global community.

TONEX Free Unlimited at a Glance:

- Unlimited free tone downloads - Discover and download unlimited free Tone Models and presets through ToneNET directly inside TONEX 2 Player
 - Unlimited Tone Model creation - Create unlimited Tone Models of amps, cabinets and pedals with the included TONEX Modeler's easy, guided workflow for Mac or PC
 - Unlimited sharing - Share original Tone Models and presets on ToneNET and contribute distinctive sounds to the global community
- 120 Tone Models included free - Start playing immediately with 40 Premium Tone Models from IK Multimedia and 80 from professional Tone Partners, pre-installed and ready to explore

- From shared link to sound - New in version 2.2, paste a ToneNET Tone Model or preset URL into the TONEX search bar to find and select that content directly
- Powerful tools already included - Shape sounds with 15 built-in effects, discover tones with Smart Search and dedicated browsers, and organize a personal library with Favorites and custom folders
- One connected platform with room to grow - Get the standalone Player, plug-in and Modeler in the free CS installation, with optional paid collections, TONEX Rig and TONEX hardware to expand the possibilities.

From rare vintage amplifiers to coveted boutique designs and modern high-gain rigs, TONEX connects musicians to an extraordinary range of captured guitar and bass gear. With Free Unlimited, TONEX 2 CS removes the limit on free Tone Model and preset downloads. Players can explore more than 60,000 free and premium Tone Models and presets on ToneNET, discover the work of the global community and professional Tone Partners, and download as many free sounds as they want directly inside Player. Paid collections remain available separately. The powerful discovery tools already available in TONEX 2 Player make that world easy to explore. Smart Search, search filters and dedicated browsers help players find inspiring sounds, while Favorites, Recently Used content and custom folders keep an expanding library within reach.

TONEX Free Unlimited starts with a curated library of 120 Tone Models, pre-installed and ready to play at no cost. Combining 40 Premium Tone Models from IK Multimedia with 80 from professional Tone Partners, the collection brings professionally captured amps, cabinets and pedals straight into every player's studio. It is an inspiring starting point in its own right and a gateway to thousands more free sounds through ToneNET. The 15 effects already built into TONEX 2 Player give musicians the tools to shape those captures into sounds for practicing, recording and performing.

Unlimited tone discovery is only the beginning. TONEX 2 CS now also gives musicians the freedom to create unlimited Tone Models of their own gear with the included TONEX Modeler. Powered by IK's V2 AI Machine Modeling technology, Modeler captures the sound, feel and response of real amps, cabinets and pedals. Its existing guided workflow and batch processing for Mac or PC make it easy to turn the sound of a treasured amplifier, favorite pedal or distinctive rig into a personal collection of digital tones.

Completed captures join the connected TONEX library, ready to play, record and share through ToneNET. With no limit on captures or uploads, every musician can become a tone creator and contribute their own sonic signature to a worldwide community. Version 2.2 also introduces a more direct connection between shared inspiration and the playing experience. Paste a ToneNET Tone Model or preset URL into the TONEX search bar, and the application finds and selects that content directly. A recommendation from a friend, a favorite creator or the wider community becomes an immediate route to discovering a new sound.

Together with integrated browsing, auditioning and downloading, this new feature brings the community even closer to the music. TONEX Free Unlimited opens the door to a platform that can grow with every player's ambitions. Optional Signature and Tone Partner collections bring new sounds and distinctive creative perspectives. The paid TONEX Rig upgrade adds advanced routing, multi-amp setups and expanded effects. TONEX hardware takes compatible tones from the computer to rehearsal and the stage. Each addition builds on the same connected experience, with the free edition providing a powerful foundation for discovering, playing and creating.

TONEX version 2.2 is available now through IK Product Manager as a free update for all TONEX users. New users can get TONEX 2 CS, the free edition featuring TONEX Free Unlimited, through IK Product Manager. A single installer includes the standalone Player, plug-in and TONEX Modeler.
