Launchkey and Cubase 12 Integration Update

Steinberg’s latest update with Cubase 12 is a significant improvement from the previous HUI script, giving Launchkey owners a more seamless experience using the MIDI keyboard with Cubase.

Now, Launchkey owners can stay focused on their music with screen feedback, and quick access to essential controls makes working in Cubase with Launchkey more intuitive. Automatic set up gets them creating straight away – just plug in and play. With deeper mixer control, creators can get the perfect mix and tweak on-screen parameters straight from the hardware.

Creators can combine Launchkey’s inspirational creative features with quick access to essential Cubase DAW controls. Automatic set up and deeper mixer control allows creators to act on inspiration quickly, get closer to their music and take their music production even further in Cubase.

The new Cubase integration provides a range of benefits, including:

- Screen feedback to indicate parameter control
- Mute/solo/select/arm tracks
- Automatic set up
- User quick controls
- Navigate between tracks
- Control pan/volume
- Control FX sends
- Control transport
- Improved layout

Additionally, from now, until May 20, 2022, all Launchkey owners will receive 10% on the full version of Cubase Pro 12, Cubase Artist 12, Cubase Elements 12 and the Competitive Crossgrade from other DAWs exclusively in Steinberg's online shop. If applicable, you can access the discount code via your Novation customer account. Offer expires May 20, 2022.
