Logickeyboard TITAN

Logickeyboard announce the launch of our latest keyboard - designed to address the evolving needs of modern users who demand more from their editing experience. By incorporating dual connectivity options and backlit keys, wrapped in an aluminum chassis, we aim to provide a keyboard that not only enhances productivity and comfort but also adds a touch of style to any workspace.

TITAN Keyboard Features:

- Dual Connectivity: The TITAN keyboard offers dual connectivity, enabling you to effortlessly switch between wireless or wired connection with just a keystroke. It is designed and optimized for use with MacOS but can easily be connected to an iPad or iPhone as well, or to two Macs – one corded and another wirelessly – making it ideal to master two workstations.
- Backlit keys with 5 adjustable levels: For the best adaptation to working in low-light environments the keys on TITAN are backlit, and the illumination is dimmable in 5 levels. If used without the backlight feature the TITAN keyboard provides energy for months' use before recharge is necessary.
- Operating system: macOS
- Aluminum chassis: Titanium Gray

he Logickeyboard TITAN series will be available for a wide range of editing software, including industry-leading platforms such as Adobe Premiere Pro, Avid Media Composer, Avid Pro Tools, Blackmagic DaVinci Resolve and Apple Logic Pro X. Visualizing all the app shortcuts you need and puts them right at your fingertips, translating into higher productivity and more time for creativity.
