

Arturia MiniFuse 2 OTG

MiniFuse 2 OTG takes the trusted MiniFuse formula mobile. Record voice, instruments, and line sources with high-quality preamps, then send the mix straight to a phone, tablet, or laptop with zero fuss. Dual USB ports make it easy to route audio between multiple devices, while loopback, direct monitoring, and MiniFuse Control Center put every signal under control.

MiniFuse 2 OTG delivers an intuitive and ready-to-use solution for streamers, content-creators and musicians alike. Connect directly to your phone or tablet to record and stream. Share audio between two-computers. Monitor it all through the MiniFuse Control Center. MiniFuse 2 OTG delivers flexible connectivity with dual combo inputs (with 48V), direct monitoring, loopback, dual USB ports for computer and mobile, a USB-A hub, balanced TRS outputs, and power-bank-ready USB-C.

Small, light, and rugged, the MiniFuse 2 OTG is built for a life on the go. MiniFuse 2 OTG comes with a tailored software suite, fit for a studio-quality sound in a wide range of use cases.
