

Mercurial Audio Spark Update

Mercurial Audio present an updated version of Spark as part of Ampbox. The updated Spark is the result of Mercuriall Audio's more than 10 years of experience in tube amp modeling. Previously, Spark was available as a separate product, but now it is included in Ampbox with all its features and a set of effects. The update also includes a new free Spearion overdrive based on the Klon Centaur scheme. It pairs well with the JCM800 and other Ampbox amplifiers. The release price of the new amplifier is 79.99 USD for 10 days (The full price is 99.99 USD). All users of the old Spark version receive the updated Spark as part of Ampbox for free. It is already available in your profile.

The new Spark as part of Ampbox includes:

- Marshall JCM800-based amplifier with vintage tubes in Svetlana's EL34 power amplifier (SVEL34) and MOJOTONE JCM800 HTS-7256 output transformer
switchable power amplifier feedback circuit mode with increased BASS resonance depth and smoothed high frequencies; EL34EH pentodes are used in this configuration
- Preamp mod #34 and #34, designed by Frank Levi
- Preamp tubes selection: 12AX7JJ or 12AX7WC

Mercurial Audio updates Spark as part of Ampbox v1.8

Thursday, 05 February 2026 15:00

- A large number of original presets of musicians and sound engineers are available for Spark. Including presets from Steve Stevens (Billy Idol, Michael Jackson and many others)

Previously, the old Spark included an AFD amplifier (Slash model) based on mods #34 and #36. In the new version, Mercurial Audio have reproduced the original schemes of these mods. The new Spearion overdrive is based on the SPICE simulation of the original Klon Centaur circuit with 1N34A germanium diodes. The specifics of the pedal allow you to work in the range from booster to overdrive. The updated version of Ampbox 1.8.0 is already available on the website mercuriall.com.

With the release of the updated Spark in Ampbox, the sale of the old Spark version stops.
