Mercuriall Ubersonic

Mercuriall Audio presents Ubersonic – a new, powerful, and unusual Ampbox amplifier, designed for textured, aggressive, and expressive high-gain sound. Ubersonic is inspired by the character of the Bogner Überschall Rev. Blue, one of the most recognizable and beloved revisions of this amplifier.

Features:

- The Hi-Gain channel, combined with an unusual tonestack in the power amplifier section, forms a rich, "bold" tone with a thick bottom, a bright attack, and a crisp upper mid.
- The Clean channel opens from a crystal-clear clean to an expressive breakup in the power amplifier with the feedback turned off.
- The output stage uses EL34 tubes, which add characteristic density, dynamics, and musical compression to the sound.
- Ubersonic is based on electronic circuit modeling technologies using machine learning.

Mercuriall Audio is a pioneer in the application of machine learning to model tube amplifiers, and over the years we have accumulated extensive and flexible experience in the development of Neural-Hybrid Engine technology. This technology allows you to simulate the behavior of a real circuit in real time, while maintaining high accuracy, dynamic responsiveness, and low CPU load.

The updated version of Ampbox 1.9.0 is already available on the website below. The release price of the new amplifier is $79.99 (99.99) for 10 days. And for the duration of this promotion, the Summer Sale continues with 33% off all other amplifiers:

- Ubersonic - $79.99 (99.99)
- The new Spark - $66,99 (99.99)
- Ampbass BST-7 - $39,99 (59.99)
- SUN-100 - $66,99 (99.99)
- Tweed Blues - $59,99 (89.99)

Phoca PDF

- Tweed Bass - $59,99 (89.99)
- 1987X-SG - $59,99 (89.99)
- 6160III - $59,99 (89.99)
- Rectofire - $59,99 (89.99)
- Euphoria - $59,99 (89.99)
- Reaxis - $39,99 (59.99)
- U530 - $39,99 (59.99)
- SS-11X - $26,79 (39.99)

The promotion will last until July 28th 2026.
