

Mercuriall Audio Ampbox v1.7.0

Mercuriall Audio has updated Ampbox to v1.7.0. The Ampbass BST-7 is a bass amplifier based on the Ampeg SVT-7 PRO. It was created using SPICE modeling for the most realistic sound and tube amp dynamics. The launch price is \$49,99 (59.99) - with a 10-day discount for new users. Included is A-Mega DISTORTION, a free bass distortion based on the Darkglass Alpha-Omega. Also fully modeled with SPICE - powerful, lively, authentic.

New IRs:

- Bass Cabinets from Shift Line
- Guitar Cabinets from Arsafes

Improvements:

- Up to 25% faster operation of power amplifiers (starting with models like 6160III)

Enjoy a 33% discount on all other amplifier models - only during the launch Promotion as a Halloween sale.
