

meris prEDITOR v4

prEDITOR 4 is a desktop editor/librarian for Mac/PC users now for Ottobit X, Enzo X, MercuryX and LVX. You can create and organize presets and libraries with lightening speed. Connect via USB-C to prEDITOR v4 which now includes a new fully integrated community portal to share and receive presets without leaving the app. prEDITOR 4 is now available to download for free on the website below.

Moreover, Ottobit X is now even mightier. Now compatible with prEDITOR 4, download the latest/free firmware update v1.1.1 for Ottobit X to connect to prEDITOR 4. Other enhancements have been added to the firmware including Looper Quantize to Tempo, etc. New firmware update is preloaded when purchased directly on the website below. 80s Dream Reborn, Ottobit X in matte black is in-stock now.
