

Mixland 3348 TAPE

Mixland announces the release of 3348 TAPE, a groundbreaking emulation that brings the sound of the legendary 3348 digital tape machine into your DAW for the first time ever. 3348 TAPE is a flexible box full of buttery harmonic goodness, with sounds that range from subtle enrichment to aggressive distortion. Whether you're adding warmth to your tracks or creating bold, experimental soundscapes, 3348 TAPE has you covered.

The fun doesn't stop there: Mixland modeled a collection of uncharted vintage units to include in this powerhouse plugin! From the crisp clarity of the 3348 to the warm magic of the X80, each mode delivers a truly unique sonic signature that you won't find in any other plugin. It will give you a toner.

Key Features:

- **Authentic 3348 Emulation:** Faithfully recreates the iconic digital tape machine.
- **Versatile AD/DA Conversion:** Choose from 7 legendary AD/DA converters for diverse sonic possibilities.
- **Powerful Harmonic Distortion:** Shape your sound with rich, warm distortion.
- **Flexible Emphasis Control:** Add warmth and character with precise emphasis.
- **Precise Gain Staging:** Optimize your signal flow with linked auto-gain.
- **Bypassable Transparent Limiter:** Smooth out transients and prevent distortion with a musical, bypassable transparent limiter.
- **Intuitive Interface:** Easy-to-use controls for efficient workflow.
- **Presets:** Save and load custom presets for streamlined production.
- **6-Band Equalizer and Spectrum Analyzer:** Precise frequency shaping and

monitoring.

- Oversampling: Increase sample rate for improved audio quality and reduced aliasing.

3348 TAPE is available now for an introductory price of \$37.99 through november as part of Mixland's special Black Friday Extravaganza month-long sales event. After that, the price will return to \$49.99. Additionally, MIXLAND is offering a TOTAL BUNDLE deal, including 3348 TAPE, Subloom, Rubber Band Compressor, Tilt, and SteamDriver, for just \$99. 3348 TAPE is compatible with macOS M1, M2, M3 Native (Mac OS X 10.7 and higher) and Windows 64bit (Windows 7 and higher) in AAX, VST3, and AU formats. No iLok dongle required.

Compatibility:

- Available in AAX, VST3, and AU formats
- macOS M1, M2, M3 Native (Mac OS X 10.7 and higher)
- Windows 64bit (Windows 7 and higher)
