

## Major Musik Hack SweetEQ Update

Today, Musik Hack rolls out a major update to SweetEQ with new features that make the workflow extremely more versatile, while keeping the ease and effortlessness of the plugin.

This update adds the following features to the plug-in:

- The new Bandpass Filter Modes allows to limit the range where SweetEQ does its processing without cutting the highs or lows out completely, as well as a hybrid feature for cutting and blending without undoing highs and low cuts.
- New Clip Out Modes include soft clip, hard clip, and clip off for more flexibility. Continue to use soft clip to add slight edge to bass or on less aggressive material, use hard clip for brightness, or turn it off if you have a specific mix workflow.
- Mid-Side Mix Mode can be accessed by clicking "stereo mix" to toggle between stereo and mid/side. This allows you to blend in the processed signal to either the mono center or the side signal for soundstage effects or special cases.
- Stereo Imaging: If the plugin instance is mono->stereo and you select

## Musik Hack releases Major Update to SweetEQ

---

mid/side mode, it creates a phase-coherent (mono-safe) stereo image when lifting the "side" knob. In this mode, "side" defaults to zero.

All of this processing is done in parallel, allowing you to tweak every knob, button, and slider without worrying about phasing issues or mono problems.

If you already own (or are renting-to-own) SweetEQ, click the Update button in the bottom-right corner of SweetEQ to install the update. After running through and completing the installer steps, restart your DAW and reopen your project to use the latest version of SweetEQ.

SweetEQ is available at the website below for the introductory price of \$79 (reg. \$99) or Rent-to-Own \$6.50/month introductory rate (reg. \$8.25/month) for 12 months. If you've already tried SweetEQ, and are curious about these updates, you're welcome to restart your unrestricted demo for another 10 days. Check your email for a demo extension link, or email Musik Hack for assistance.
