

NoiseWorks Audio The Complete Bundle

NoiseWorks Audio, creators of VoiceAssist and DynAssist, today announced the Complete Bundle, bringing VoiceAssist Advanced, GainAim, TranSplit and Enshape together as a single one-time purchase. The bundle costs over 20% less than buying the four plugins separately.

Features at a Glance:

- VoiceAssist Advanced: the full edition of NoiseWorks' AI-assisted vocal and dialogue editor. All seven processing modules (Clean, Lowend, Gate, Dynamics, Breath, Sibilance and Mouth Noise), Spectral Editing, the standalone application and iLok support.
- GainAim: a real-time vocal rider that brings vocals and dialogue to a target loudness as they play, with latency low enough for live work.
- TranSplit: splits a signal into its transient and sustain, so a single slider adds attack or weight.
- Enshape: a transient designer driven by two envelope followers instead of a threshold, shaping attack and sustain directly.

Each plugin in the bundle is delivered with its own licence key, and every licence covers two devices. Licences are managed via a NoiseWorks account. VoiceAssist Advanced can also be transferred to iLok; GainAim, TranSplit and Enshape remain

on the NoiseWorks licensing system.

All four plugins are available in AU, VST3 and AAX formats for macOS and Windows. VoiceAssist Advanced requires: macOS 13 or later on Apple Silicon (M1 to M4), or 64-bit Windows 10 (version 1909 or later) with a dedicated NVIDIA or AMD graphics card. 16 GB RAM minimum on both platforms. GainAim, TranSplit and Enshape run on macOS 12 or later (Intel and Apple Silicon) and 64-bit Windows 10 (version 1909 or later). Trial versions are also available from the website below.

The Complete Bundle is available from October 20th 2026 priced at £299 / \$349 / €349, a saving of over 20% on the combined price of the four plugins bought individually.
