

## A sleek, black and silver OWC Thunderbolt 5 Dual HDMI Dock. The device features a black top surface with the OWC logo. The front panel is silver and includes a power button with a blue indicator light, a 30W USB-C power port, two USB 3.2 10Gb/s ports, a USB 3.2 10Gb/s port, and two SD card slots (SD UHS-I and Micro SD). The side of the dock is labeled "THUNDERBOLT 5 DUAL HDMI DOCK" and features the OWC logo.

With the OWC Thunderbolt 5 Dock with Dual HDMI one connection provides the displays, storage performance, networking, power, and connectivity of an enterprise-class desktop workstation – without the need for a pile of adapters and workarounds. Its key features include:

- **No More Adapter Hunting:** Two HDMI 2.1 ports built right in. Any monitor that has HDMI plugs directly into the dock with zero compatibility guesswork.
- **Everything Through One Cable:** A single Thunderbolt 5 connection delivers dual displays, wired networking, storage, card readers, and full laptop charging simultaneously.
- **140W Power Delivery:** Keeps MacBook Pros and high-performance Windows

laptops fully charged at peak performance while running the entire connected setup.

- **Fast Device Charging:** The front USB-C port delivers up to 30W of charging for your smartphone or tablet while you work.
- **Storage without Bottlenecks:** The downstream Thunderbolt 5 port runs external SSDs and RAID arrays at full rated speed. The dock will never be the slowest thing in the chain.
- **Fast, Stable Wired Networking:** 2.5GbE delivers the throughput needed for NAS workflows, large file transfers, and secure corporate environments.
- **Pull Media Directly from Cards:** UHS-II SD and microSD slots let photographers and video editors offload footage without a separate card reader.
- **Built for What's Next:** Supports dual HDMI displays at up to 4K 240Hz or dual 8K 60Hz with DSC on Thunderbolt 5 hosts. A third display is possible via Thunderbolt or USB-C. This dock won't become a bottleneck when you upgrade your setup.
- **Works with the Whole Fleet:** Compatible with Thunderbolt 5, Thunderbolt 4, USB4, USB-C, and Thunderbolt 3 (Mac) hosts across Mac and Windows environments.  
OWC Innergize Enabled: A complete health, performance, and field update management app when using OWC Atlas SD memory cards with the dock's SD memory card reader.
- **Fits Your Desk, Your Way:** Place it flat or stand it upright. This dock is built to support both horizontal and vertical desk placement.  
One-Click Safe Disconnect: OWC Dock Ejector unmounts every connected drive in a single click. On macOS, an included driver also enables Apple Super Drive support through the dock.

"Thunderbolt 5 gives you tremendous performance and capability. The real question is what you do with it," said Larry O'Connor, Founder and CEO, Other World Computing (OWC). "With the OWC Thunderbolt 5 Dock with Dual HDMI your laptop is no longer the compromise. One connection gives you the displays, storage performance, networking, power, and connectivity of a serious desktop workstation - without the pile of adapters and workarounds. We didn't set out to build another Thunderbolt 5 dock. We set out to build the one professionals will measure the others against."

O'Connor added, "This addition to our dock line-up is a result of customer feedback. Our goal is to continue to ensure our customers always have a choice when it comes to picking the solution(s) that best meet their individual desktop/workflow requirements."

OWC Thunderbolt 5 (USB-C) Cables, now available in a 1.5-meter length, deliver the fastest, most compatible cable for connecting today's, tomorrow's, and yesterday's Thunderbolt and USB-C devices. The cable's key features include:

- **100% USB-C Compatible:** Connect to today's, tomorrow's, and yesterday's

Macs, PCs, iPads, Chromebooks, Surface, and other devices with a Thunderbolt 5, Thunderbolt 4, Thunderbolt 3, USB4, or USB-C port.

- Lightning Quick: Work and play faster with up to 80Gb/s of bi-directional data speed and up to 120Gb/s for higher display bandwidth needs.
- Versatile Connections: Connect to millions of docks, displays, eGPUs, PCIe expansion, external SSDs, RAID storage, and accessories.
- Powerful: Lab-certified to safely deliver up to 240 watts to charge the most power-hungry notebook computer.
- Stunning Visuals: Connect to the latest and future Thunderbolt, USB-C, and DisplayPort displays for incredible 4K, 5K, 6K, and up to three 8K displays.
- Guaranteed Quality: 3 Year OWC Limited Warranty.

“Thunderbolt 5 is about removing limits, and that includes how and where you connect,” said O’Connor. “And, with our new 1.5-meter cable, you get more freedom to build the setup that works for you without sacrificing the speed, power, or reliability Thunderbolt 5 delivers.”

The OWC Thunderbolt 5 Dock with Dual HDMI will be generally available (GA) in November and priced at \$349.99. The Thunderbolt 5 (USB-C) Cable in a 1.5-meter length availability is planned for the middle of October and will be priced at \$58.99.

The industry will have the opportunity to see the new OWC Thunderbolt 5 Dock with Dual HDMI and Thunderbolt 5 (USB-C) Cable now available in 1.5-meter length live and in-person during the International Broadcasting Convention, IBC 2026, taking place September 11-14, at RAI Amsterdam, in Hall 7, OWC Booth 7.A60.
