

Polyend Play+

The original Play set the standard for instant playability. Play+ takes Polyend's unique groovebox experience to new heights with an upgraded internal architecture, which enables a host of new features and enhancements while retaining the same sleek Play form factor. Immerse yourself in richer stereo sounds, delve into multitimbral polyphonic synthesis, and experience seamless audio over USB.

Choose from 4 original synth engines, each offering a unique character. Every synth engine includes an extensive library of professionally crafted presets ready to inspire straight out of the box. And when you want to tailor that sound just so? Sculpt and morph with a suite of intuitive multi-macros, making sound design easily accessible to you. Staying true to the spirit of Play, the synth engine is fast and easy to use. The Play's pick-and-place interface, generative options, and scale locks will have you making tracks faster than ever.

Customers can ship their original Play to Polyend locally, once your unit is received, Polyend will simply ship you a new Play+. After customers have completed the
