PSP Audioware Levelizer

PSP Audioware has announced the release of PSP Levelizer, an advanced auto-fader processor designed to maintain consistent audio levels while preserving the natural dynamics, musicality, and transparency of the original performance. From vocal leveling and bass control to dialogue processing and mix automation, it delivers consistent levels while preserving the natural, musical sound. It can hold a target level or make a track follow an external signal, enabling creative level-control techniques beyond conventional dynamics processors. PSP Levelizer is suitable for live sound, recording, mixing, and mastering applications, with lookahead controls that can be optimized for each situation.

The integrated sidechain EQ lets you focus the detector on specific frequencies. Three reaction modes - Sharp, Normal, and Smooth -allow everything from fast transient control to gentle, natural gain riding. For added output protection, PSP Levelizer also includes a high-quality brick-wall limiter with adjustable drive, ceiling, release settings, and stereo linking options.

Key Features

Phoca PDF

- Advanced auto-fader level control
- Internal or external sidechain operation
- Intelligent reference-level tracking
- Three reaction modes: Sharp, Normal, and Smooth
- Adjustable response timing and action characteristics
- Flexible sidechain filtering with Shape EQ and Bell EQ sections
- Multiple lookahead ranges for precise level management
- Adjustable gain range limits with optional soft boundaries
- High-quality brick-wall output limiter
- Comprehensive preset management system
- Designed for transparent, musical, and natural-sounding level control

Typical Applications

- Vocal level riding
- Podcast and dialogue leveling
- Bass and instrument consistency
- Broadcast and post-production workflows
- Mix-responsive vocal automation
- Drum and percussion level control
- Mastering preparation and level management
- Creative sidechain-controlled gain automation

PSP Lelelizer is available immediately from PSP Audioware and authorized resellers worldwide. To celebrate the release, PSP Audioware is offering PSP Levelizer at a special introductory price of $49 USD until June 30th, 2026. After the promotional period, the plug-in will be available at its regular price of $69 USD. Up to date iLok License Manager application installed (an iLok dongle not required). By default, we provide 3 licenses.

Minimum System Requirements

- Windows 7 – Windows 11, VST3, VST, AAX, 64-bit compatible application
- macOSX 10.15 – macOS Tahoe, AudioUnit, VST3, VST, AAX, 64-bit compatible application
