

RAUM+KLANG 2026

RAUM+KLANG 2026 is an international conference dedicated to the future of Spatial Audio and immersive media. Developed by ZIMMT in partnership with the Spatial Audio Network Europe (SANE), the event creates an open environment where artistic practice meets technical innovation. Across two days of talks, workshops, listening sessions, and live performances, RAUM+KLANG encourages interdisciplinary dialogue across music, film, games, XR, and audio technology, connecting experimental ideas with real-world production and emerging markets.

The Core Vision RAUM+KLANG is an international conference dedicated to the future of Spatial Audio and immersive media. Bringing together artists, researchers, developers, audio engineers, producers, and creative industries, the conference explores how immersive sound is actively transforming music, film, games, XR, and interactive media. At the heart of the event is the cross-disciplinary exchange between artistic research, technological innovation, and industry workflows. Rather than presenting finished solutions, RAUM+KLANG creates an open environment for experimentation, connecting experimental concepts with practical applications and future production markets.

The Programme & Experience The two-day programme combines inspiring

theoretical insights with hands-on, practical exchange:

- Talks & Deep Dives: Industry experts explore current tools, production methods, and cutting-edge creative workflows.
- Listening Sessions: A curated, shared space designed to experience, test, and compare immersive sound works.
- Breakout Discussions: Focused, round-table conversations that encourage direct dialogue between artists, developers, and industry partners.
- Live Performances: Evening showcases that demonstrate Spatial Audio in practice through live music and media art.

A Growing Global Community Developed in collaboration with SANE, RAUM+KLANG connects regional European initiatives with international perspectives. It serves as a vital platform for a growing worldwide community working to advance immersive audio through collaboration, shared knowledge, and new professional partnerships. Whether you are composing, designing, developing, researching, or producing immersive experiences, RAUM+KLANG offers a unique environment to connect with Europe's spatial media community and shape the future of sound together.
