

RME M-32 Pro II

RME announces the M-32 Pro II Series consisting of four new audio networking devices. Each unit consists of a specific combination of MADI, AVB, and Dante and offers either 32 channels of A/D or D/A conversion.

Boasting up to 32-channels, fully equipped MADI I/Os (coaxial & optical via optional SPF module), improved specs with extremely low THD values, intelligent channel routing and innovative usability, the brand-new M-32 Pro II Series truly represents the state-of-the art in exceptional audio performance.
